RE: Changes to the Pension Plan – 2023 Maximum Covered Work Hours for Pensioners

This notice, also known as a Summary of Material Modification (SMM) notifies you of a change to the Twin City Iron Workers Pension Plan (the Plan).

Notwithstanding the following change to the Plan, Pensioners are not promised a minimum number of work hours. If you are receiving a non-disability pension and wish to return to work, you must contact the union hall and clear your employment through the business manager. Requests will be evaluated based on labor force needs at that time.

The Plan normally permits most Pensioners to work in Covered Employment up to three hundred (300) hours per year without incurring a suspension of monthly benefit payments.

The Board of Trustees has acted to temporarily increase the number of hours Pensioners can work in Covered Employment without incurring a suspension of monthly benefit payments. Effective for work performed in 2023, Pensioners may work in Covered Employment up to one thousand (1,000) hours without incurring a suspension of monthly benefit payments.

If you are receiving a non-disability pension and are under age 62, you may work up to 1,000 hours in Covered Employment in 2023. If you work more than 1,000 hours in 2023, your pension will be suspended for each month you work after you reach the 1,000 hour limit, up to a maximum of 12 monthly benefit payments.

After age 62, you can work in Covered Employment for up to 1,000 hours in 2023 without a suspension of benefit payments. If you work more than 1,000 hours, your benefit will be suspended for any remaining months in 2023 in which you work or are paid for at

least 40 hours in Disqualifying Employment, beginning with the month in which you exceed the hours limit. *No work is considered disqualifying after the month in which you turn age 70½.*

This amendment impacts 2023 work only. Unless the Plan is amended again, the maximum number of hours most Pensioners may work in Covered Employment without incurring a suspension of monthly benefit payments in 2024 and after will revert to three hundred (300).

Please contact the Plan Administrator at (952) 854-0795 if you have any questions about this change to the Plan or any other feature of the Plan.

RE: Changes to the Pension Plan Effective in 2024

- Pension Credit Value for 2024 Set at \$250
- New Early Retirement Age
- New Early Retirement Reduction Factors

This notice, also known as a Summary of Material Modifications (SMM), describes changes to the Twin City Iron Workers Pension Plan. The Board of Trustees has made three changes to the Plan, each effective in January 2024. They are described below.

Pension Credit Value for 2024 Set at \$250

After carefully reviewing the current and projected funding status of the Twin City Iron Workers Pension Plan (the Plan), the Board of Trustees has amended the Plan to increase the value of Pension Credits earned in 2024 from \$100 to \$250 per credit.

This amendment impacts only the Pension Credits earned in 2024. Unless the Plan is amended again, the value of Pension Credits earned in 2025 and after will revert to \$100 per credit.

New Early Retirement Age Effective in 2024

The Board of Trustees has amended the Plan to reduce the age at which certain Participants may commence to receive an Early Retirement Pension for those benefits earned in the Plan on and after January 1, 2010. Prior to this change, this early retirement benefit was available to all qualified participants upon attainment of age 57. After the change, effective January 1, 2024, that age is reduced to age 55 for participants who meet each of the requirements below:

1. The Participant is first retiring on or after January 1, 2024;
2. The Participant has attained at least age fifty-five (55);
3. The Participant has earned at least a partial Pension Credit for work performed on or after January 1, 2024;
4. The Participant has earned ten (10) or more Pension Credits; and
5. The Participant has at least one full Contribution Service Pension Credit earned on the basis of Work in Covered Employment during the Contribution Period.

New Early Retirement Reduction Factors Effective in 2024

The Board of Trustees has amended the Plan to change how early retirement pension benefits earned on and after January 1, 2010 will be calculated for certain eligible Participants. The Plan will apply a different set of early retirement reduction factors for those Participants who are covered by the amendment. To be eligible, a Participant must 1) earn at least a portion of a Pension Credit for work performed in 2024 or later years, and 2) must first retire from the Plan on or after January 1, 2024.

If a Participant meets the requirements described above, the monthly amount of his or her Pension that is attributable to Pension Credits earned from 2010 until retirement will be reduced as follows:

- If benefits begin at or after age 60, there is no reduction.
- If benefits begin before age 60, then the reduction is 1/3% for each of the first 12 months, plus 1/4% for each of the next 24 months, plus 1/3% for each of the next 24 months that benefits begin before age 60.

Prior to this change, the reduction was calculated as follows:

- If benefits begin at or after age 60, there is no reduction.
- If benefits begin before age 60, then the reduction is 1/3% for each of the first 12 months, plus 1/4% for each of the next 24 months that benefits begin before age 60.

Benefits earned prior to 2010 are not affected, nor are the benefits for individuals who retired prior to 2024.

Please contact the Plan Administrator at (952) 854-0795 if you have any questions about this change to the Plan or any other feature of the Plan.
